Profile

I am a focused, ambitious, hard working person who can communicate effectively having worked with and served a wide range of people. My University course has helped me to become well rounded in the field of Web, having completed modules based around both Design and Development. My experience in Industry since University has further improved my Front-end Development skills. I am currently working as a Front-end Developer at Drummond Central.

Education

University 2013 - 2017: Northumbria – Web Design & Development (BSc)

Experience in several areas: HTML5, CSS3, SASS, JavaScript, jQuery, PHP5, SQL, Git, WordPress, Adobe Creative Suite

A-Levels: A – Graphic Design
B – Economics, Information Communication Technology
B – Extended Project (AS Level equivalent)

GCSEs: A – Electronic Products, English Literature, French, German, Mathematics
B – Biology, Chemistry, Physics, English Language, Business Studies, ICT
C – Geography, Religious Education

Web Related Work Experience

July 2018-Present: - Worked at **Drummond Central** as a Junior Front-end Developer
- Involved - building modular, CMS based websites to match UX designs and meet client expectations
- using JavaScript to add functionality to websites as well as working collaboratively with the Vue.js framework on more recent larger projects.
- designing a full set of page mock-ups for a client website.
- Assisting the apprentice as well as other developers with any questions they had with learning or their own work.

Feb-July 2018: - Worked at **Holiday Discount Centre** as a Junior Web Developer
- Involved - maintaining and adding new features to the company's price comparison websites.
- building a bespoke web based system to help keep track of staff work hours.
- creating designs for email templates and advertising campaigns.

- July-Sept 2016: - Worked at **Keltie Cochrane** as a Digital Intern full time over 8 weeks.
- Involved - implementing improvements to the Keltie Cochrane website based on wireframes from the team's senior digital designer.
 - designing and producing wireframes for a client website.
 - producing an email template for a client based on the senior digital designer's wireframe.
 - designing a Welcome Pack for one of the company's clients.

University Industrial Placement

- Sept 2015-June 2016: - Worked at **HMRC** as an Assistant Software Developer.
- Involved - working with other developers to complete back end project tasks in an Agile/Scrum environment.
 - learning the programming language Scala.
 - running tests and interacting with the project's Git repositories using Terminal
 - helping to carry out user research and usability testing on my team's product.

Further Web Related Work Experience

- Summer 2014: - Worked at **Team Valley Web Design** for 1 day a week over 6 weeks.
- Involved researching client based projects, creating mock-ups in Photoshop and then coding up & styling into web pages.
 - Arranged to give an insight into real life projects
- Sept-Nov 2012: - Worked at **Team Valley Printers** for 1 day each week.
- Involved shadowing the in house graphic & web designers and drawing up ideas to help them complete work for the company's clients.
- June 2012: - Worked for a week in the **Gateshead Council** Web department.
- Involved researching projects and redesigning Council's Intranet.

Other Work Experience
